ANALYSIS

OXFORD MATERIALS CHARACTERISATION SERVICE

Examples of facilities available include:

- Optical microscopy
- Molecular spectroscopy (UV/visible/NIR, imaging FTIR, imaging Raman)
- Profilometry (optical, contact stylus)
- Scanning probe microscopy
- Micro and nano mechanical measurements
- Thermal analysis (TGA, H-DSC, Microcalorimetry)
- BET surface area determination
- Particle sizing and zeta potential measurements
- Electron microscopy and microanalysis
- Surface analysis (XPS)
- X-ray diffraction
- X-ray fluorescence
- Comprehensive range of sample preparation facilities, including wet/dry processing, FIB, etc.
- Materials Processing Facilities
- UKAS Accreditation 4637 for the Elemental analysis of Glass by SEM/EDX.
